

India Pavilion in
EAST AFRICA
PHARMA EXPO 2023
03 - 04 October 2023 >> Nairobi, Kenya

EEPCINDIA
ENGINEERING THE FUTURE

Chairman's Pen

I am glad EEPC India is mounting a team of close to 40 Indian Exhibitors to the 7th East Africa Pharma Expo 2023, which will take place in Nairobi, Kenya from October 3rd to 4th. It will exclusively focus on East African pharma manufacturing industries, and will be supported by Kenya's Pharmaceutical Industry to create an ideal platform for meeting the target audience in one place.

It will co locate with East Africa Lab Expo 2023 at the same venue. East Africa Lab Expo 2023 offers innovative solutions from leading market players for buyers in

the medical technology industry across East Africa. These buyers are actively seeking new products, equipment, services, and solutions to stay up-to-date with industry trend.

I am sure this edition will bring in fresh business for the visiting team

Arun Kumar Garodia

(Arun Kumar Garodia)
Chairman, EEPC India

Chairman of the Committee on Trade with Central, Eastern and Southern Africa, EEPC India

India's development cooperation with African countries has evolved to include trade and investment, capacity building, technology transfer, and grants and concessional loans. This bilateral milieu focuses on human resource development, institution building, infrastructure, clean energy, agriculture, health, education and skill development. They also work together on addressing climate change and sustainable development of blue economy.

At the same time, India is fostering development cooperation with African countries through initiatives such as the India-Africa Summits, becoming a member of the African Capacity Building Foundation, and launching the "Team 9" Initiative connecting India with francophone Africa.

India and Kenya share a significant bilateral trade relationship in the engineering sector. This trade accounts for over 34% of the total merchandise trade between the two countries.

Both India and Kenya have decided to deepen bilateral trade and investment partnership by encouraging greater industry to industry ties. The two nations recognized positive developments in terms of bilateral trade, investment and collaboration between the businesses in India and Kenya in various areas.

I wish good luck to the visiting Indian Exhibitors to East Africa Pharma 2023

Sd/-

(Rohinton R Engineer)

Dy Regional Chairman (WR) &

Chairman of the Committee on Trade with Central, Eastern
and Southern Africa, EEPC India

ED's words

Pharmaceutical is one of the top ten attractive sectors for foreign investment in India. In India there are around 17,000 pharmaceutical companies and around 800 pharmaceutical machine manufacturing and allied utility service units in the small and medium sector. The Pharma sector currently contributes to around 1.72% of the country's GDP.

The Pharmaceutical industry in India is the 3rd largest in the world in terms of volume and 14th largest in terms of value.

There are more than 350 facilities in India's pharmaceutical-machine manufacturing industry, in categories like instrumentation and process control, lab equipment, pharma research and development (R&D) tools and techniques, pharmaceutical machinery, packaging material and machines, plant design and engineering, pharmaceutical process technology, and software.

The exports of pharma machinery in India have increased during the last 4 years. The CAGR of exports during FY 19 – FY 22 registered 10 percent whereas imports decreased by 1 percent.

An increasing number of foreign pharmaceutical-machine manufacturers also have recognized India's achievements and evolution in the industry. Indian machines are manufactured and used in accordance with international standards and do not hazard the inspection and approval of their facility. This is one of the many reasons that India has the most FDA-approved facilities in the world outside USA.

I am sure East Africa Pharma 2023 is a right forum for Indian suppliers of Pharma Industry

Thank you.

(Suranjan Gupta)
Executive Director
EEPC India

About EEPC India

EEPC India, or the Engineering Export Promotion Council of India, serves as the bridge connecting India's engineering industry to global markets. This premier trade organization empowers Indian engineering enterprises to navigate international trade complexities and fostering their growth and competitiveness globally.

Through targeted market research, skill enhancement programmes, and capacity-building workshops, EEPC India equips domestic engineering firms with the necessary tools to understand international demand trends, refine their product offerings, and meet stringent quality standards. Additionally, the council's strategic collaborations and participation in global trade exhibitions enable Indian exporters to showcase their innovations to a broader audience, fostering valuable partnerships and opening doors to new markets. This multifaceted approach helped Indian engineering exports achieve a remarkable transformation – from US\$ 10 million in 1955 to US\$ 107.04 billion in April 2022 - March 2023.
